# Bold your brand.
Brand your signature.

Letsignit

Simple tool. Huge impact.

A centralized interface to manage all your employee's email signatures so that they no longer have to deal with signature-related issues.

Relax, it's so easy to use!

Automatically push email signatures on each new email on Outlook (available for Mac & Windows, no administrator rights needed). Users can preview signatures before sending and also check/modify coordinates.

Plug & play: In one click, distribute email signatures on Office 365 webmail and on any mobile device.

MAJOR FEATURES ———

Automatically insert/update email signatures in Outlook, Office 365 webmail and on any mobile device
